DIGITAL HORIZON SOLUTIONS PARTNERS WITH ASSA ABLOY

FRISCO, TEXAS—September 15, 2008 - Digital Horizon Solutions (DHS), a progressive provider of integrated access control solutions announces a technology partnership with ASSA ABLOY Door Security Solutions to create a wireless networked access control solution. DHS has integrated the Profile Series v.S2, a networked access control product from ASSA ABLOY Group brand SARGENT, into the Eclipse™ Software Suite providing the ability to manage the mechanical locking device from a centralized location through an existing wireless network.

Benefits of this solution include ease of installation, time savings and cost reductions based on minimal requirements for labor and peripherals. The SARGENT hardware supports open standard WiFi network security with encryption and the Eclipse System incorporates it into its powerful .NET open architecture to provide the ability to monitor and real-time locking capabilities of a door. Customers can enjoy having the reader, lock, command and control capabilities all in one package.

Kevin Klemmer, Director of Integrated Security Solutions of ASSA ABLOY states, “We have been very impressed with Digital Horizon’s commitment and ability to bring this new technology to their customers. They completed the substantial portion of the integration in a matter of weeks.”

“We are excited to announce this technology partnership with ASSA ABLOY and its operating company SARGENT Manufacturing. This solution provides our end users with the Best of Both Worlds; they can have an affordable wireless lock solution monitored by a full featured enterprise security management system.” said John Carter, President of Digital Horizon Solutions.

About Digital Horizon Solutions

Headquartered in Dallas, Texas, Digital Horizon Solutions (DHS) provides enterprise-level access control and integrated security solutions designed for today’s IT environments. DHS’ scalable and robust Eclipse™ security management solution affords customers a powerful and user-friendly technology which enables them to combat the ever-increasing threats posed to security, life safety and asset protection. With more than 30 years industry experience, the DHS team has developed enterprise solutions for airports, military installations, government facilities, universities, hospitals, and Fortune 500 companies around the globe. DHS is a wholly-owned subsidiary of Keri Systems, Inc., an acknowledged leader and innovator of facility access and security systems, including proximity card access control, telephone entry systems, video surveillance and proximity readers

About ASSA ABLOY
